

PHYSIOTHERAPY AND BIODEX

SELF-PAY: PRICING INFORMATION - FYLDE SPORTS INJURY CLINIC (FYSICL)

Physiotherapy fees vary slightly according to which physio you will see and whether:

Initial/New Assessment (normally around 60 minutes **£90**)

Review (normally 30 minutes **£50**).

No discounts apply to our visiting physiotherapists (who work on a self-employed basis).

But FYSICL prides itself on only working with very experienced physiotherapists who have worked with injured patients and athletes at the highest level, and bring this know-how and skill to the clinic patients here in Kirkham.

The exact time at the first physio visit will depend somewhat on the nature and complexity of your problem.

We recommend you allow a full hour for this first assessment and treatment plan. Please enquire for more details on individual costs at reception 01772 802200.

If our in-house visiting physios are unavailable (for leave or otherwise) we also refer to a handful of trusted affiliated physiotherapists who focus on exercise prescription and a strong ethos of rehabilitation as a key part of the treatment. Please enquire about whether this option may suite you better, as this may also reduce your need to travel.

BIODEX:

Assessment, screening or rehabilitation/strength sessions are available on the isokinetic dynamometer BIODEX machine - please enquire regarding the various costs (each type of BIODEX session requires varying amounts of time and expertise).

For more details on BIODEX please email us at info@fysicl.co.uk, or call our reception on 01772 802 200
